AGRONOMY FALL SOIL SAMPLING

Post-Harvest soil testing is an ideal time to collect accurate fertility data while nitrate levels remain stable. Sampling before tillage provides cleaner, more consistent cores and gives you the results needed to set nitrogen rates and make informed fertility decisions.

Give us a call to get your fields scheduled!

Mitch (701) 848-6888

Grant (701) 848-6209

Test now. Plan ahead. Apply with confidence.
